

Who we are

HANSEN Energy Solutions is a new technology and service company based on the following: Sharing, Innovation, Creativity, Integrity, Performance and Teamwork.

Committed to meeting customer challenges, we will analyze your needs to offer the best, most efficient and cost effective solutions to help accomplish your goals.

Whether it be integration of existing products and services from multiple companies along with new inventions, methods, and tools by HANSEN Energy Solutions, or working with your own internal research and development group, we will assemble the resources best suited for your specific project.

Although we are a new company, we have substantial experience in international business in the areas including, but not limited to, wellbore technology, wellhead and subsea technologies and operations.

Through continuing development of our own ideas and IP, as well as integration of products with technology and service companies, we will partner with you to help achieve your goals.

Cindy Conroy and Henning Hansen founded HANSEN Energy Solutions to work toward finding new solutions for the energy industry that are smarter, more cost effective, and more efficient in the quest to enhance production.
